

EUROPEAN COLLEGE OF PHYSICAL AND REHABILITATION MEDICINE

The European College of Physical and Rehabilitation Medicine is a non-profit scientific foundation, established in 1991.

The objectives of the foundation are:

1. To ensure optimum care in terms of rehabilitation of patients in the countries of the European Community
2. To protect the international level of the title of specialist in Physical and Rehabilitation Medicine and its professional status in society.
3. To monitor, promote and protect the highest possible level of identical care given to patients in Europe in the field of rehabilitation.
4. To establish close ties between the national professional associations of specialists in Physical and Rehabilitation Medicine with a view to coordinating and supporting their activities.
5. To contribute towards creation and maintenance of solidarity among the European specialists in Physical and Rehabilitation Medicine.
6. At the level of the international authorities, to monitor, promote and protect the free movement of the European specialists in Physical and Rehabilitation Medicine, as well as their moral and material interests.
7. To cooperate with the European medical world, in particular with the Standing Committee of European Physicians, with the UEMS and with the European Society of Physical and Rehabilitation Medicine.
8. To organize by all possible means, exchange of information on subjects concerning Physical and Rehabilitation Medicine and the physicians practicing this branch of medicine.
